

PRESS RELEASE

COMP Cams® GoParts™ Semi-Finished Pushrod Kit

Increased strength pushrods are best alternative yet for high performance Briggs & Stratton Animal and 305 10 hp engines

Until now, only a few, poor choices for upgrading the performance of your Briggs & Stratton racing engine pushrods existed. To the rescue is GoParts™, which has just introduced their new Semi-Finished Pushrods Kits that deliver supreme strength, durability and adjustability far beyond anything previously available. These 7-inch long, 0.250-inch diameter, 0.035-inch wall thickness pushrods feature a 3/16-inch ball press-in tip. In addition, the pushrod kit allows you to customize your pushrod length to adapt to your deck height, rocker arm ratio, camshaft base circle size, lifter design or valve stem length.

The GoParts™ Semi-Finished Pushrod Kit is the best replacement for the comparatively weak aluminum hobby rod commonly used with these engine applications. For any OHV single cylinder engine builder looking to build one of a kind modified engines for a wide range of needs, these are the best way to go. Perfect for any use from karting to lawn mower racing, these pushrods can also be used to increase the valve train strength of Honda OHV engines as well.

For more information about GoParts™ Semi-Finished Pushrod Kit or any other GoParts™ product, call us at 1-800-976-9376, or visit us online at www.compgoparts.com.

Quick Summary

Product: GoParts™ Semi-Finished Pushrod Kit
Part Number: #GP4700 (7-Inch Pushrod, .0250-Inch Diameter); GP4710 (Pushrod Tip with 3/16-Inch Ball); GP4750 (Semi-Finished Pushrod Kit)

Features & Benefits:

- Semi-finished pushrod kits for upgrading race engine pushrods for Briggs & Stratton Animal and 305 10 hp engines
- Can be used in Honda OHV engines as well
- Semi-finished for adjustability due to engine requirements
- Features 7-inch long length, 0.0250-inch diameter and 0.035-inch wall
- Lightweight yet rigid enough for significantly increased strength over competitive pushrods
- Ball tip press-in design easily inserts into pushrods
